

Eduroam for Mac OsX

1. Activate the wireless network (if it is not already done) and choose Connect to other network.

2. Write:

- Network name = eduroam
- Security = WPA2 Enterprise
- User name = *username@ad.bth.se* or *username @students.ad.bth.se*.
- Password = your AD-password.

3. Choose 802.1x if it is not done automatically.
4. Check "Remember network".

5. Trust the certificate. Click continue.

6. Confirm that you trust the certificate by entering the **password for your computer**.
